

Career in Artificial Intelligence

- Exploring Future opportunities AI
- Presented by : Rungta international skills university (CG)
 - Designed by : Aditya kumar

Introduction

- Artificial intelligence (AI) means making machines think and act like humans.
- Used in automation , robotics , and data analysis.
- AI is transforming the world .

Educational Path

- Qualification : B. TECH CSE AI/ML in Computer science .
- Skills : Python , Machine learning, Mathematics , Statistics
- Certification : Google AI , Coursera , Udemy

Key skills required

- Programing (python ,html ,css ,C)
- Data Handing & Analytics
- Problem solving
- Creativity & Logical Thinking

Carrer Opportunities

- AI Engineer
- Data Scientist
- Machine learning Expert
- Research Scientist

Growth and salary

- Average Salary : 6-15 LPA (India)
- High global demand for AI professionals.
- Future scope : Ai in every field – Health ,transport ,education.

Conclusion / Reference

- AI is the future of technology and innovation .
- Learning Ai opens global oppotunties .
